

CB 05 D

FEATURES:

- Heavy-duty, Low cost, and High quality
- Stroke
- Quick resetting lever
- No power required
- Long mechanical life

APPLICATIONS:

The heavy-duty design of the CB 05 D ratchet/stroke counter makes it ideal for most mechanical counting applications.

Typical applications include tool machines, winding machines, automatic machines, presses, shearing machines, printing machines, extruded material, etc...

DESCRIPTION:

The CB 05 D mechanical counter is a 5-digit counter with high durability and low cost. This counter is made of a die-cast zamak body and an ABS plastic face. Internally it has metal kinematics motion devices.

The CB 05 D has right rotation (see fig 1) and is base mounted. It also has a reset lever, which zeros the counter by pulling the lever.

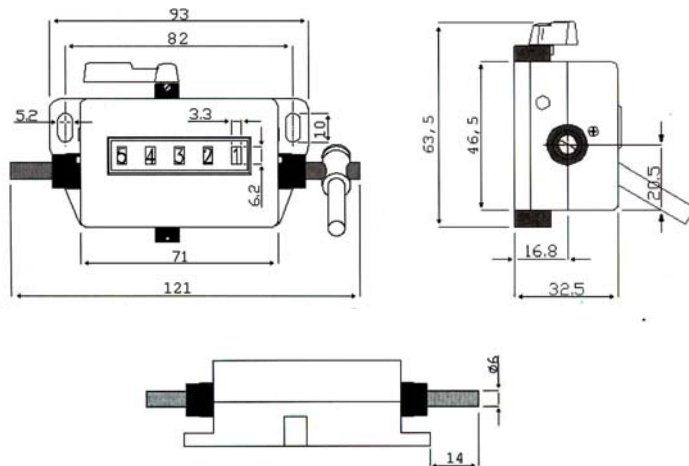

COUNT FUNCTIONS:

CB: (Stroke) One count per stroke drive. Stroke handle included.

SPECIFICATIONS:

Digits	5
Figure Size	3.3 mm x 6.2 mm
Shaft Diameter	6 mm
Shaft Position	Both sides
Direction	Right rotation
Reset	Lever
Max. Speed (cpm = counts per minute)	CG: 5000 cpm CB: 700 cpm
Weight	357 g

DIMENSIONS: mm, 1mm = .03937" (1" = 25.4mm)

Ordering Information:

Example: CB 05 D

MODEL	CB 05	D
CODE	1	2

CODE:

- 1 Series
CB 05 = Stroke counter
- 2 Rotation
D = Right
